

Changing the Platen
Instructions for changing the platen on the Sumitag SS-SX printer.

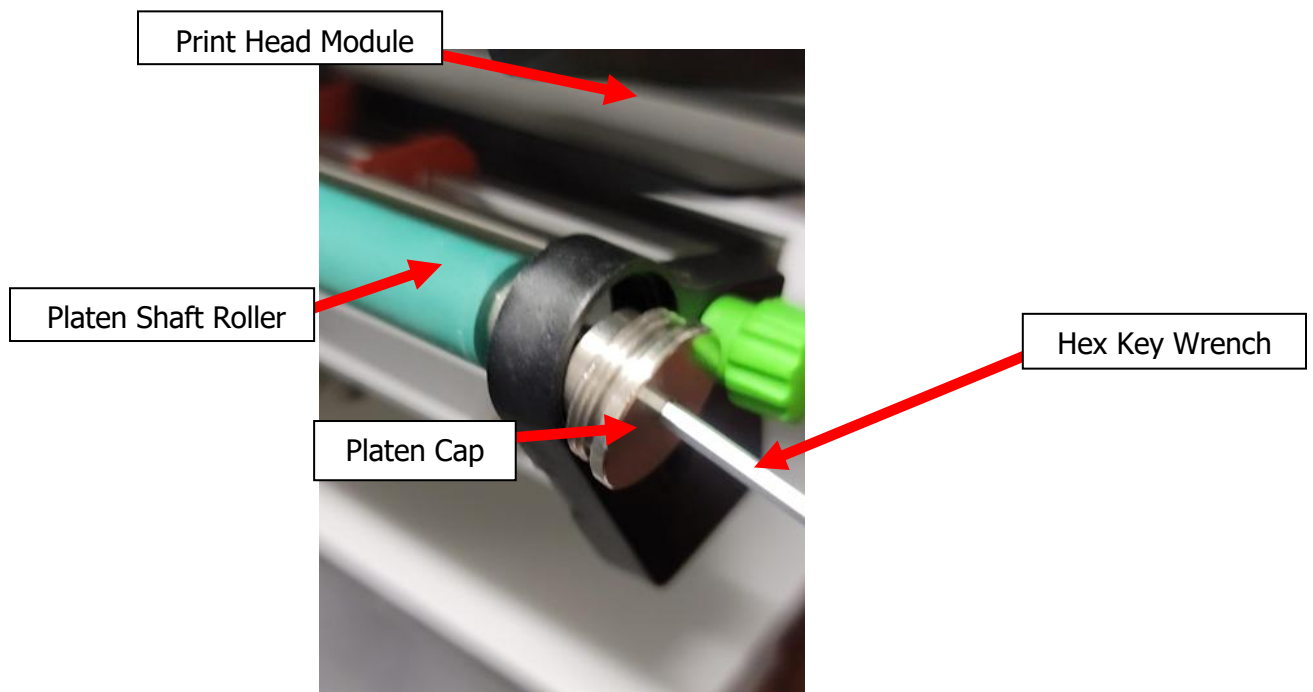

Figure 1

To change out the **Platen Shaft Roller**:

1. Power the printer off
2. Turn the green **Print Head Latch** to the right to unlatch and open the **Print Head Module**.
3. Locate the **Platen Shaft Roller** which is directly below the **Print Head Module** (see Figure 1)
4. With the included hex key wrench, loosen then remove the **Platen Cap** (Figure 1). This will release the platen from its mounting position.
5. Pull the platen out of the printer. Replace the used platen with the new one. Insert the end of the new platen into the extended mounting shaft (Figure 1b).
6. To reinstall the **Platen Cap**, follow the removal instructions in reverse.
